## Rooted in Community, Driven by You.

Established in 1974, Access Communications is a 100% Saskatchewan-based, community-owned not-for-profit co-operative. Our members include individuals and community-based organizations who share a common goal—making life better in the communities we serve. As a not-for-profit co-operative, we don't return earnings as dividends. Instead, we reinvest them to improve our products and services, expand our community channel programming, and support local initiatives.
